Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2115

1. This action is in response to the amendment filed on January 30, 2007. Claims 1-102 are pending.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4, 6-7, 9-10, 12-17, 20, 22-23, 25-28, 31, 33-34, 36-41, 44, 46-47, 49-52, 55, 57-58, 60-65, 67-68, 70-71, 73-102 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Bear et al., U. S. Patent Application Publication 2004/0225901.

Bear et al describe the claimed invention including primary and auxiliary/secondary processing systems with figures 1, 2, 8 and 10. The auxiliary system independently handles activities while the computer is in the standby (inactive) state. The auxiliary processing system can process activities such a answering and recording phone calls, handling voice mail, displaying e-mail,

browsing the internet and recording TV shows without having to turn on the computer.

5. Claims 5, 8, 11, 18-19, 21, 24, 29-30, 32, 35, 42-43, 45, 48, 53-54, 56, 59, 66, 69, and 72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bear et al., U. S. Patent Application Publication 2004/0225901.

Claims 5, 8, 11, 18-19, 21, 24, 29-30, 32, 35, 42-43, 45, 48, 53-54, 56, 59, 66, 69, and 72 recite obvious variations of well known data processing elements and procedures and these claims would have been obvious to one of ordinary skill in the art in view of Bear's teachings and suggestions of auxiliary processors, displays, input devices and memory devices. The location/placement of the auxiliary processing system is a matter of design choice as Bear describes and claims that the auxiliary processor can be coupled to a computing device or housed within the computing device. Bear describes providing an input device for the auxiliary computing system. A touch pad is a well known input device and it would have been obvious to use a touch pad as the auxiliary input device.
